

# Analysis of unstructured data

## Assignment 1

**Janusz Szwabiński**

Download the “Titanic disaster” dataset available at Kaggle. Using `pandas`:

1. Check what features are available in the dataset.
2. Clean the data if required.
3. Create a pie chart presenting the male/female proportion.
4. Create a scatterplot with the “Fare payed” and the “Age”, differ the plot color by gender.
5. Check how many people survived.
6. Create a histogram with the 'Fare payed'.
7. Create your own questions and answer them!
